In our comment letter on early admin draft,(to be sent late April) , we will discuss status of 404 issues,
including this one. We could do in a separate correspondence but i'd lean against that.
We need to make sure we stay in sync with Corps on this.

Hi Paul,
Thanks for the response on this. Did you respond at all to Mike N or Mike F? We should make sure they
include us in a meeting about the JD work and/or condition assessment.

At the other end of the CWA 404 NEPA-integration; DWR is suggesting we have meetings every 6 to 8
weeks because most of the people working on BDCP right now are staffing another set of meetings. So, it
is going to be very slow going and in-effect sequential consideration of CWA after ESA through NEPA.

Hi: looks like DWR is changing the game plan per Mike's email below. I'd note that this represents a fairly significant depart for the JD work in particular, and perhaps to a lesser degree the condition assessment part.

There's probably not much to do until Jean and Gail get back in touch, unless Erin has some notion of what that might be.

Paul

Classification: UNCLASSIFIED

Caveats: NONE

Mike and Paul,

As you remember, DWR (Gale and Jean) worked out with us a wetland assessment strategy for BDCP (attached files). As it turns out, they are going to have to modify their approach. Main problem is that no-one will let them onto their property.

At some point in the near future they will send us a modified approach, for us to review and decide if it will be

sufficient for 404b1 analysis. We'll probably meet with Gale/Jean to have them talk us through their new proposal.

Thanks

Michael G. Nepstad
